That looks good to me- I don't have any additional edits.

Subject: Revised Hickman Write Up

Hi,

Here is the revised version. I accepted most of the edits and made some more. Please review again. I talked to Tim Franquist of ADEQ yesterday about this situation. Here is what I learned:

- ADEQ has no plan or strategy for these facilities.
- Arlington is in Area A and they feel it's subject to the AG BMP Program. Do we know if Arlington has a general permit from ADEQ?
- No one seems to know the VOC emissions from either Tonopah or Arlington. If they are big enough, there might be a hook since this an ozone nonattainment area for both the 2008 and 2015 standards. They are trying like mad to avoid that situation because they have no VOC offsets available.
- This area is not nonattainment for PM 2.5 so ammonia is not a precursor for the County or the State. They only regulate PM-10.
- ATSDR is collecting information from ADEQ so I don't know if that means ATSDR is going ahead with a review. I have called with them today so I will ask.

Colleen
